### WAR ON RURAL AMERICA

We the people have to start asking our state and federal representatives why they are letting our state and federal governments become stagnant with old, out of date ideologies. We also have to ask how we are going to overcome and prepare for another created government Apocalypse (a rapid swift change).

We have to get informed on how history repeats itself. We must ask our congress-people how they are going to stop the War on Rural America (War on Poverty). People don't understand that this war was created in the '50s and Congress implemented their strategies in the late '60s by using corporate religious cults.

Today they use the strategy of usury. Usury is the illegal action or practice of lending money at unreasonably high interest rates. Top management also uses unreasonably high prices to make higher profits by making less products and cutting labor costs and operation costs. This is how inflation is created and the slogan "Profits before People" got started.

This is not a new idea. This is an old Biblical problem that top management fails to recognize. You can see how history repeats itself by reading Nehemiah, chapter 5. You must read the whole chapter so that you can get the background of the problem.

We must learn that people who fear the Lord give generously to those that need it. Their good deeds should never be forgotten. These are the people who should have influence and honor.

On the other hand, people who are morally bankrupt will be infuriated when they come to realize the real facts. They will grit their teeth in anger; they will slink away, their hope of stopping people from completing a project must be stopped.

### New Mural At Bosque Redondo Memorial

By Christina Claassen

A new tile wall mural, entitled "Reactions to Hweeldi (place of suffering)," is now open as an outdoor exhibit at Bosque Redondo Memorial at Fort Sumner Historic Site.

The mural is a collection of 1,276 tiles that were created by students who have visited the site since 2007. The project was started as a reflective activity for students to express their thoughts after learning the difficult history of the site as a Native American internment camp in the 1860s.

Tile mural features designs by more than 1200 young visitors to Bosque Redondo Memorial.

We have to be on high alert for people using misleading facts, and perfected and contrived staged effects to deceive and mislead us to accomplish their agenda.

Sincerely,  
s/Ted Kuzdrowski

### TRUMP AND OTHER RINOS BETRAY SOCIAL VALUES IN ORDER TO GET ELECTED

Upholding social values is more important than winning elections. Another way Trump and other RINOs betray social values is by compromising these values in order to get elected.

This especially occurs in Blue States and counties; that is, States and counties in which Democrats are in the majority. In essence, they want to appear more like liberals, like Democrats or Independents, then social conservatives. This leaves true social conservatives with no one to vote for. The only choices they have are a liberal Democrat, a liberal Independent, or a liberal RINO, who thus have the same position on social values. Therefore, no matter who gets elected, true social conservatives lose before the election even begins because there is no one running for office who upholds social values.

Upholding social values is also more important than winning an election in order to convert liberals and educate youngsters not to fall into the liberal camp. If no party is professing social values, then there would be no way to convert liberals and educate the youngsters.

Yes, Republicans who uphold the social values in Blue States or counties will lose for several cycles, but at least the voters will have a chance to hear their positions in an uncompromising and convicted way and thus have a chance to convert the liberals or for the youngsters to not fall into the liberal camp.

Let us take Christianity as an example. In the beginning Christianity was opposed by almost everyone. But the apostles and other Christians did not compromise or hide the gospel but preached it on the housetops. And they eventually converted more and more men to true Christianity. If they had compromised the gospel either by not teaching parts of it and hiding some of it or by denying parts of it, then they would not be teaching the true gospel and they would not be true Christians, and thus their converts would not be true Christians. They would be converting men to a false Christianity. St. Paul mentions this:

"I wonder that you are so soon removed from him that called you into the grace of Christ unto another gospel. Which is not another, only there are some that trouble you, and would pervert the gospel of Christ. But though we, or an angel from heaven, preach a gospel to you besides that which we have preached to

you, let him be anathema." (Gal. 1:6-8)

This is true with any organization, ideology, or religion. If it is to be consistent with its core tenants, it cannot compromise them. Hence the same can be said of the RINOs: There are some who pervert social values and thus teach immoral values, and therefore let them be anathema to all social conservatives.
